SWAPNIL VATS

+91 9608923924 | swapnilvatssv@gmail.com | LinkedIn | GitHub

SUMMARY

Final-year Computer Science undergraduate skilled in Python, JavaScript/TypeScript, and Java, building and deploying AI-powered tools and workflows with GenAI, RAG, and REST APIs. Strong problem-solving, clear communication, and cross-functional collaboration, suited for AI-driven design tooling and workflow automation roles.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

SRM Institute of Science and Technology 2023–2027

CGPA: **8.94** / **10.00**

SKILLS

AI/LLM Integration: Google Gemini API, Groq (LLaMA 3.3), Prompt Engineering, GenAI, RAG, LangChain, Custom GPTs, AI-Powered Tools & Workflows

Generative AI & Design Tools: Stable Diffusion, ComfyUI, Midjourney, Figma, Blender, KeyShot, AI Ideation & Rendering Tools

Programming Languages: Python, JavaScript, TypeScript, Java, C++, SQL, DSA, OOP

Application Deployment: Vercel, Render, Web Apps, Prototypes, Internal Utilities, Linux

Frameworks & Technologies: FastAPI, Flask, Streamlit, Gradio, Node.js, Express, React, Next.j

Authentication & APIs: REST APIs, JWT Authentication, API Integration, Postman, Scripting & Automation, n8n

Databases & Data Analysis: PostgreSQL, MySQL, MongoDB, Supabase, Pandas, NumPy, Matplotlib, Plotly

Tools & Workflow: Git, GitHub, VS Code, Debugging, Unit Testing, API Testing, Documentation

PROJECTS

IPL Transfer Credibility Engine GitHub | Live Demo

Next.js, TypeScript, FastAPI, Neo4j, Google Gemini

- Built an AI-powered scoring tool with Gemini GenAI, integrating REST APIs across frontend and backend.
- Developed source-reliability model, analyzing 15+ sources against defined criteria for data-driven insights.
- Delivered end-to-end web app owning backend logic, API design, testing, and live deployment.

SAP Enterprise Process Simulator GitHub | Live Demo

React, Node.js, Express, SQLite, Vercel, Render

- Built full-stack tool simulating Procurement, Sales, and Finance workflows using REST APIs and SQL.
- Implemented backend validation rules such as 3-way match and credit checks to handle edge cases.
- Built and deployed web dashboard on Vercel and Render, integrating APIs with React frontend.

Codebase Explorer GitHub | Live Demo

Python, FastAPI, React, ChromaDB, Groq (LLaMA 3.3), Sentence Transformers

- Built Python/FastAPI backend using RAG and LLMs to process and query unstructured codebases.
- Developed hybrid AI workflow combining vector search and LLM reasoning for structured output.
- Tested and validated with a dedicated testing framework, achieving 70% precision accuracy

CERTIFICATIONS

ServiceNow Certified Application Developer (CAD) ServiceNow

SAP Certified – SAP Generative AI Developer SAP
